These results relate only to the sample(s) submitted. Sample(s) were received in acceptable condition unless stated otherwise on this report. This laboratory is not responsible for total particulate/spore concentrations which are dependent on non-laboratory personnel sample collection. Debris rating is an indication of non-fungal spores present on the trace and is graded on a scale of 0-5, with 5 indicating the most debris. There is no current data supporting a critical or threshold exposure limit to fungal aeroallergens.
